

Breathalyser® PLUS

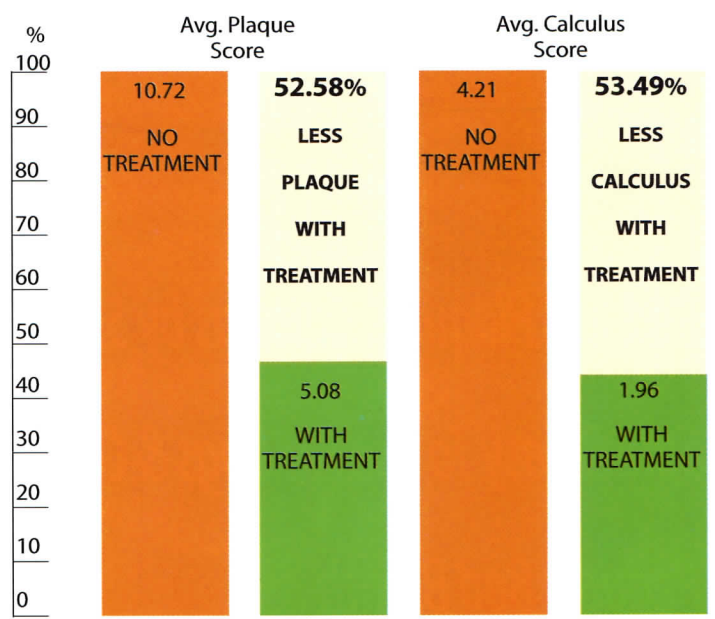

The new Breathalyser Plus* **easy-to-use** once a day administration continues to offer increased owner compliance for at-home dental care. Our effective combination of ingredients gives your veterinary care staff a technical and professional advantage when discussing the pros and cons of dental products.

After thousands of satisfied clients, Breathalyser Plus* has two more reasons for recommending & dispensing:

Zinc Gluconate: One of the most effective tools to combat halitosis.

Emilgase: Breaks down residual food protein by-products that may putrify to release sulfur, a major upstream source of odor in the oral cavity.

Cat Study:

Statistics shown above are from the article "Drinking Water Additive Decreases Plaque and Calculus Accumulation in Cats" by David E. Clarke BVSc, MACVSc in the Journal of Veterinary Dentistry, Vol. 23, No. 2, June 2006

Ingredients Include:

- Zinc Gluconate:** Immune stimulant / breath freshener
- Emilgase:** Patented proteolytic enzyme that breaks down proteins to reduce their role in plaque formation
- *Xylitol:** Plaque prevention
- Chlorhexidine digluconate:** Anti-microbial/Preservative

* Low doses of Xylitol safe for use in dogs and cats. See study on website - www.imrex.ca
