

- ✓ Reduce Bad Breath
- ✓ Reduce Plaque and Tartar
- ✓ Safe and Easy-to-use

Green Tea Extract has been shown to combat oral plaque.

- Send home with your pet owner as daily maintenance.

A three week clinical evaluation was conducted on fifteen mixed breed dogs and five cats.¹

The results showed:

- Acceptance was good with both cats and dogs.
- The owners found a definite reduction of mouth odours.
- Most owners reported improvement of gingival colour.
- All wanted to continue to use this product.

¹Study conducted and overviewed by Dr. Peter Emily.

Chlorhexidine gluconate 0.12% rinse is an effective oral antiseptic.

- Use daily for preparation of oral cavity prior to any dental procedure.
- Send home with your pet owner for immediate post treatment therapy and also for 2 weeks following post treatment therapy.
