Simple Solution to a BIG PROBLEM

What’s Happening in your Pet’s Mouth?
Check all that apply:

WARNING SIGNS

☐ Bad Breath
☐ Plaque and Calculus Build-up
☐ Sensitivity Around the Mouth
☐ Pawing at the Mouth
☐ Difficulty Chewing Food
☐ Bleeding/Inflamed Gums
☐ Loose or Missing Teeth

If you have check marked AT LEAST ONE of the above, your pet could be experiencing oral/dental problems. If left untreated, this could lead to irreversible dental conditions. Please review this with your veterinarian.

Simple:
Add 2 capfuls to 1 litre of water each day.

Effective:
Pet owners report positive results in as little as 2 weeks.

Economical:
One bottle lasts an average sized dog over 7 weeks with daily use.

53% less plaque and calculus*

Xylitol is safe to use in dogs and cats**. Follow the label directions for dosage administration.

Toothpaste for dogs & cats
Targeting Bad Breath at the Source
BreathaLyser® oral health products contain an effective antibacterial agent to prevent the growth of micro-organisms associated with gingivitis and/or other mouth, tongue and gum diseases.

Targeting Bad Breath at the Source
BreathaLyser® oral health products contain an effective antibacterial agent to prevent the growth of micro-organisms associated with gingivitis and/or other mouth, tongue and gum diseases.

To apply BreathaLyser® Oral Gel with palatable vanilla flavouring, gently lift the lip and cheek area and apply directly onto the teeth and the gum line.

To apply BreathaLyser® Toothpaste with Mint or Chicken flavouring, gently lift the lip and cheek area and brush using a soft-bristle toothbrush or finger brush. Talk to your veterinarian about how to introduce your pet to daily tooth brushing.

Water additives for dogs & cats
How to use:
• Pour 10 mL (approx. 2 capfuls) of BreathaLyser® Water Additive to 1 L of drinking water daily.

Oral gel for dogs & cats
How to use:
• Apply once or twice daily directly onto the gums of the upper and lower molars on each side of the mouth.
• Alternatively, the gel may be applied onto a cotton swab or cotton buds.

Toothpaste for dogs & cats
How to use:
• Brush once or twice daily using a soft-bristle toothbrush or finger brush.
