Veterinary exclusive
Satisfaction guarantee

A Canadian company built on more than 50 years of combined veterinary science experience where R&D, formulation, testing, and manufacturing are focused in Canada.
Quality products for animal oral health

Water additives for dogs & cats
Effective Oral Antimicrobial Agent
Emilgase and chlorhexidine digluconate reduce plaque formation, gingivitis and or other mouth, tongue and gum disease. Zinc gluconate combats volatile sulfur compounds to improve quality of breath and gum tissue. 53% less plaque and calculus*

Safety and Efficacy Studies Available

Toothpaste for dogs & cats
More than just brushing
Chlorhexidine digluconate prevents the growth of micro-organisms associated with plaque formation, gingivitis and or other mouth, tongue and gum disease. Cysteine and zinc gluconate combat volatile sulfur compounds to improve quality of breath and gum tissue. Non calcium based abrasive for safety.

• Low-abrasive polisher
• Mechanical effects of brushing
• Palatable vanilla-mint and chicken flavours
• Available in 50 mL tubes

Oral gel for dogs & cats
Prolonged activity
Essential surface adherents and thickeners enable the gel to remain on the oral surfaces prolonging the activity of the ingredients. Chlorhexidine digluconate prevents the growth of micro-organisms associated with plaque formation, gingivitis and or other mouth, tongue and gum disease. Zinc gluconate combats volatile sulfur compounds to improve quality of breath and gum tissue.

• Palatable vanilla flavour
• Ready-to-use
• No refrigeration required
• Alcohol free
• Recommended for patients who will not tolerate brushing

Hemostatic Solution for dogs & cats
Fast Acting
A solution that quickly stops gingival bleeding.

• Aqueous based product for easier and faster application than with glycol based products
• Epinephrine-free to provide safe action without unwanted side effects
NPN 2241522

• Reduce bad breath
• Reduce plaque and calculus build-up
• Improve client compliance
